Professional Experience

1000xdev (AI-Led Product Development Studio)

Feb 2026 – Mar 2026

Product Management Intern

- Owned end-to-end product lifecycles for **5 concurrent client products** — writing PRDs, running sprint planning, and managing stakeholder communications across parallel workstreams with zero missed deadlines.
- Translated ambiguous requirements into structured user stories and high-fidelity Figma prototypes, driving discovery-to-MVP cycles and **accelerating stakeholder sign-off by 40%**.

VyapGO (Fintech for MSMEs)

May 2025 – Aug 2025

Founding Product Manager

- Led 0-to-1 launch of a voice-powered billing app; **80+ user interviews** uncovered a critical insight that drove a full product pivot to a “Voice Ledger” model, redefining the core strategy pre-engineering.
- Instrumented Mixpanel telemetry and ran onboarding experiments that **cut time-to-first-transaction by 45%**; shipped a React/Next.js e-billing dashboard that **reduced manual data entry by 60%**.

DasetAI (Data Infrastructure SaaS)

Dec 2024 – Apr 2025

Founding Product Manager

- Defined vision and roadmap for an LLM-powered “Auto-Clean” agent; designed data contracts and schema guardrails that **reduced downstream data errors by 68%** across all pilot deployments.
- Bridged **10+ pilot users** and engineering by converting qualitative feedback into sprint-ready Agile tasks, maintaining a continuously prioritized backlog within a lean two-week delivery cadence.

Projects

RelAI — Enterprise AI Trust Engine | *Python, Multi-Agent Systems, RAG, Knowledge Graphs, LLMs*

Feb 2026

- Built a multi-agent RAG pipeline with strict schema validation and a temporal knowledge graph (“Truth Firewall”), **eliminating LLM hallucinations** and enabling per-query auditability for compliance-critical workflows.
- Architected as a reusable, multi-tenant B2B platform with modular components — targeting audit, legal, and financial services where AI reliability and data governance are non-negotiable.

Vacuum OS — Deep Work Platform | *React, Next.js, Behavioral Analytics, UX/UI Design*

Jan 2026

- Shipped a behavior-driven productivity workspace; iterated on UX from live pilot data to achieve **60–90s time-to-first-action** and **45-min avg. focus sessions** as primary success metrics.
- Architected core modules as independently toggleable features, enabling controlled rollout and A/B experimentation without disrupting active user sessions.

Leadership & Extracurricular

VIT-AP University

Apr 2025 – May 2025

Student Instructor — Tech & AI

- Designed and delivered hands-on workshops on ML, evaluation metrics, and RAG architectures to **100+ engineering students**, translating complex AI concepts into accessible, practical sessions.

Technical Skills

AI/ML: Large Language Models (LLMs), Multi-Agent Systems, RAG, Prompt Engineering, Guardrail Design, Evaluation Strategy, Deep Learning

Product: PRD & User Story Writing, 0-to-1 Product Development, Roadmapping, OKR/Metrics Definition, Agile/Scrum, A/B Testing, User Research

Analytics: Mixpanel, PostHog, Google Analytics (GA4), SQL, Funnel Analysis, Behavioral Telemetry

Engineering: Python, React, Next.js, Node.js, REST APIs, Git, Data Structures & Algorithms

Design & Tools: Figma (Wireframing & High-Fidelity Prototyping), Jira, Miro, UI/UX Principles, Advanced Excel

Education

VIT-AP University

B.Tech in Computer Science and Engineering (Final Year) | Relevant: ML, Deep Learning, DSA, DBMS, OS
