Forward Deployed Engineer – Client-Facing AI Delivery, Solutions Engineering & Production Integration – B.Tech CSE, VIT-AP University

Technical Skills

Client Delivery & Deployment: Direct Client Engineering, Solutions Architecture, Rapid Prototyping, Production Integration, Debugging Across Stack, API Troubleshooting, Customer Requirements Translation

Programming & Frameworks: Python, TypeScript, JavaScript, Java, SQL, FastAPI, React, Next.js, Node.js, REST APIs

AI / Agentic Systems: LLM APIs (OpenAI, Anthropic, Claude), Multi-Agent Orchestration (LangGraph, LangChain), Agent Evaluation & Guardrails, RAG, Vector Databases, Prompt Engineering

Cloud & Infrastructure: AWS Cloud Foundations, AWS Cloud Architecting, Docker, Vercel, Serverless

Tools & Analytics: Postman, Mixpanel, PostHog, Git, GitHub, Linux, Jira, Figma

Professional Experience

1000xdev — AI-Native Product Studio (Remote)

Feb 2026 – Jul 2026

Forward Deployed Engineering Intern (AI Solutions) | Clients across India, New Zealand, and Dubai

- Served as direct technical contact for **15+ global clients** — ran technical discovery, scoped ambiguous workflows into API architecture plans, and live-prototyped AI demos during customer calls using Python and LLM APIs for real-time validation.
- Integrated **10+ custom AI feature specs** directly into client production codebases, catching backend edge cases and integration gaps prior to rollout to cut engineering rework.

VyapGO — Fintech for MSMEs (Vijayawada) | vyapgo.vercel.app

Apr 2025 – Jan 2026

Founding Solutions & Delivery Engineer

- Managed production deployment, merchant onboarding, and technical support for a live billing app across **50+ merchant locations**, resolving real-time database sync and hardware integration bugs.
- Identified a **20% signup bottleneck** via Mixpanel telemetry; engineered and deployed A/B-tested UI/UX fixes directly based on user feedback, boosting transaction completion by **90%**.

DasetAI — Data Infrastructure SaaS (Vijayawada) | daset-ai-main.vercel.app

Dec 2024 – Apr 2025

Founding Forward Deployed Engineer

- Deployed custom AI data-cleaning pipelines directly into **10+ client pilot environments**, adapting ingestion parameters to match legacy database schemas and cutting client data processing time by **80%**.
- Established a 2-week hotfix deployment cycle driven by direct client feedback, maintaining high availability with only **2 outages** across all active pilot integrations.

Projects

RelAI — Multi-Agent Verification Pipeline | *Python, LangGraph, RAG, FastAPI* | rely-ai.vercel.app

- Engineered a multi-agent verification system that monitors AI agent outputs in real time, filtering **70% of hallucinated responses** across **20 benchmark queries** prior to user delivery.
- Architected the complete ingestion and retrieval pipeline solo, benchmarking system performance to sustain **50 requests/sec** at **100ms average latency** under load.

NotifyME — Fraud & Scam Detection Engine | *Next.js, TypeScript, LLM APIs* | notify-me-tau.vercel.app

- Built a real-time scam verification layer cross-referencing multi-agent signals to cut false alarms by **72%**, accurately processing **100+ live user submissions**.

Vacuum OS — Focus Productivity Application | *React, Next.js, PostHog* | vacuum-os.vercel.app

- Deployed a focus-work application serving **25+ active users**, integrating PostHog event tracking to run zero-downtime A/B tests in production.

Leadership & Extracurricular

RECON 2026 — National Cybersecurity Workshop, AWS Cloud Partner | reconhq.tech

Apr 2026

Lead Organizer | VIT-AP University

- Directed technical logistics and cloud infrastructure for a national event with **600+ participants**, managing speaker schedules and cloud partner coordination across 3 days with zero downtime.

University ML & AI Workshop

Apr 2025

Instructor — Machine Learning & RAG | VIT-AP University

- Instructed **100+ engineering students** on Machine Learning and RAG architecture fundamentals, translating complex systems into step-by-step implementation projects.

Education

VIT-AP University, Amaravati, India

B.Tech, Computer Science and Engineering

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Machine Learning, Deep Learning, Reinforcement Learning
