

SAMRADH AGARWAL

+91-9118433477 | samradh1515@gmail.com | linkedin.com/in/samradh-agarwal | github.com/samradh15 | samradh.dev
Software Development Engineer – AI Systems, LLM Pipelines & Full-Stack Engineering – B.Tech CSE, VIT-AP University

Technical Skills

Programming & Frameworks: Python, Java, TypeScript, JavaScript, Data Structures & Algorithms (DSA), SQL, FastAPI, React, Next.js, Node.js, REST APIs

AI / Machine Learning: Large Language Models (LLMs), LLM APIs (OpenAI, Anthropic), Retrieval-Augmented Generation (RAG), Multi-Agent Systems, Agentic AI, Agent Orchestration (LangGraph, LangChain), Embeddings, Vector Databases, Knowledge Graphs

Systems & Delivery: API Integration, Production Deployment, System Design, Distributed Systems, Microservices

Cloud & DevOps: AWS Cloud Foundations, AWS Cloud Architecting, Docker, Vercel, CI/CD

Tools & Analytics: Git, GitHub, Linux, Postman, Mixpanel, PostHog, Jira

Professional Experience

1000xdev — AI-Native Product Studio (Remote)

Feb 2026 – Jul 2026

Software Engineering Intern (AI Systems) | Clients across India, New Zealand, and Dubai

- Architected and deployed full-stack AI feature prototypes for **15+ clients** using Python, LLM APIs (OpenAI, Anthropic), and FastAPI, validating end-to-end model behavior before production handoff.
- Engineered **10+ production-ready API specs** and system architecture plans, collaborating directly with engineering teams to integrate LLM workflows into core client codebases with zero design rework.

VyapGO — Fintech for MSMEs (Vijayawada) | vyapgo.vercel.app

Apr 2025 – Jan 2026

Founding Full-Stack Engineer

- Engineered and deployed a production billing and inventory engine using React, TypeScript, and Node.js, supporting **50+ merchants** with real-time transaction processing and inventory state sync.
- Diagnosed frontend state bottlenecks and instrumented funnel telemetry via Mixpanel, refactoring onboarding flows to reduce user drop-off by **20%** and boost transaction completion by **90%**.

DasetAI — Data Infrastructure SaaS (Vijayawada) | daset-ai-main.vercel.app

Dec 2024 – Apr 2025

Founding AI Engineer

- Architected an automated AI data-cleaning pipeline in Python, utilizing LLMs to detect and correct data quality issues across **10+ pilot customer deployments**, reducing manual fixing hours by **80%**.
- Maintained a 2-week CI/CD release cadence, translating feedback into optimized microservices and API endpoints to maintain high availability with only **2 outages** across the program.

Projects

RelAI — Multi-Agent AI Trust Engine | *Python, LangGraph, RAG, FastAPI* | rely-ai.vercel.app

- Designed a multi-agent verification pipeline where agents cross-check each other's outputs before responding, catching **70% of incorrect or hallucinated answers** across **20 test queries** before reaching the user.
- Built the full pipeline solo — ingestion, retrieval, and response generation — sustaining **50 requests/sec** at **100ms average latency** with zero errors under load.

NotifyME — Multi-Agent Scam Detection & Alert System | *Next.js, TypeScript, LLM APIs* | notify-me-tau.vercel.app

- Designed a multi-agent verification layer where independent agents cross-check a reported scam before flagging it, cutting false alarms by **72%** versus single-source checks.
- Built a state-tracking pipeline that classified every report into pending, confirmed real, or confirmed fake, correctly handling **100+ reports** without duplicate mix-ups.

Vacuum OS — Deep Work Platform | *React, Next.js, PostHog* | vacuum-os.vercel.app

- Built a focus-work app instrumented with PostHog — users averaged **45-minute focus sessions** across **25+ active users**, with live A/B tests run without disrupting active sessions.

Leadership & Extracurricular

RECON 2026 — National Cybersecurity Workshop | reconhq.tech

Apr 2026

Lead Organizer | VIT-AP University

- Ran a national cybersecurity event from planning to execution — brought in **600+ participants**, managed a **Rs. 80,000+ prize pool**, and personally handled web infrastructure and speaker coordination across 3 days with **zero major issues**.

University ML & AI Workshop

Apr 2025

Instructor — Machine Learning & RAG | VIT-AP University

- Taught ML and RAG fundamentals to **100+ engineering students** using a curriculum built from scratch, turning complex AI concepts into practical, step-by-step lessons.

Education

VIT-AP University, Amaravati, India

B.Tech, Computer Science and Engineering

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Machine Learning, Deep Learning, Reinforcement Learning
